\*Heartworm Preventative is recommended every month, year round, for all cats

\*\*Flea, Mite, and Worm Preventative may be needed every month, year round for most cats.

\*\*\*FeLV vaccine boosters are recommended every one to three years in adult, outdoor cats.

\*\*\*\*The FeLV/FIV test is typically done in all kittens before vaccination series is administered and may need to be repeated in ill cats. Heartworm testing in cats is recommended yearly in high risk areas.

**Our veterinarians will tailor the wellness program to the particular needs of your pet.**

Please let us know if you have any questions about the procedures, vaccines, or other products.
